Universidad y desarrollo regional. Aportes del Cider en sus 40 años. Javier A Pineda Duque,Carmenza Saldías Barreneche,2017-02-01 Prólogo El Cider en sus cuarenta años: testimonio de un pasado con futuro Me sorprendió y me halagó el que los profesores Javier Pineda Duque y Bert Helmsing me invitaran a escribir algunas reflexiones sobre el Cider, con ocasión de la publicación de documentos que relatan su evolución en cuatro décadas, por algunos de quienes tienen el justo reconocimiento de haber sido protagonistas de su historia o continúan relacionados con su construcción. Mi vinculación con esta realización ha sido marginal. Ocurrió durante la expansión de la Facultad de Ingeniería de la Universidad de los Andes. En 1966, el Gobierno de los Países Bajos aceptó la propuesta de la Facultad de apoyarla en el mejoramiento de sus facilidades de docencia e investigación, especialmente con el uso de modelos físicos en los campos de la hidráulica y la hidrología. Para el efecto, el rector de la Universidad, Ramón de Zubiría, firmó un convenio de cooperación con la Dirección

de Asistencia Técnica Internacional del Ministerio de Asuntos Exteriores del Reino de los Países Bajos. Gracias a la idoneidad de los expertos de este país que vinieron a trabajar en la Universidad de los Andes y de los colombianos que se vincularon como investigadores y estudiantes al proyecto, su realización fue extraordinariamente exitosa y contribuyó a estrechar las relaciones entre los dos países y a incrementar el intercambio de investigadores y de conocimientos.

Aportes a un feminismo negro decolonial Lozano Lerma, Betty Ruth, 2019-07-12 La mujer negra, sus existencias subjetivas y sus modos de saber, hacer y pensar son analizados en esta investigación: la pregunta que la guió fue: ¿cuál es el pensamiento/conocimiento que las mujeres negras han producido para la vida desde su experiencia/condición/insurgencias de/al no-ser? Se plantea que las mujeres negras- en el caso específico de las habitantes ancestrales del territorio-región del Pacífico colombiano- desde su subjetividad marginalizada, excluida, subordinada, violentada, han desplegado históricamente una ontología que reivindica la vida, que demuestra que han sido sujetas activas y no entes pasivos, constructoras de mundos mediante diversas prácticas culturales (oralidad y poesía) y sociales (familia, comadrazgo, partería), con sentidos pedagógicos y espirituales que se constituyen hoy en día en alternativas al desarrollo hegemónico depredador y en aportes para el buen vivir. Se realizó un acercamiento a las voces ignoradas de las mujeres negras, que son una producción marginal, desconocida, producida como no-existente. Este texto pone el pensamiento propio de las mujeres negras del territorio-región del Pacífico, tejido con la memoria de sus ancestrales y ancestros, y expresado en la palabra escrita, dicha, cantada o recitada, en sus prácticas colectivas, en sus actos de insurgencia, en sus expresiones de agencia. Con la obra se pretende contribuir a la emergencia de voces históricamente acalladas que hablan desde su corporalidad subordinada.

Introducción al estudio de la historia de Panamá Carlos Manuel Gasteazoro,1956

Fundamentos de las Infraestructuras de Datos Espaciales (IDE) Miguel A. Bernabé-Poveda y Carlos M. López-Vázquez, Las Infraestructuras de Datos Espaciales (IDE) son, en esencia, un conjunto de herramientas técnicas, de acuerdos políticos y de estándares que permiten al usuario acceder a través de la web a la información geográfica proporcionada por organismos, instituciones y empresas implicadas. Su instalación es voluntaria en América Latina, con el auspicio del Instituto Panamericano de Geografía e Historia y del Comité Permanente de las IDE de las Américas. En Europa es obligatoria, tras la publicación de la Directiva INSPIRE, lo que ha planteado un desafío en la formación de personal especializado en ambas márgenes del Atlántico. La puesta en marcha y mantenimiento de estos sistemas, exige que haya personal técnico preparado en múltiples aspectos no adecuadamente cubiertos por ninguna titulación tradicional. No hay textos que traten el tema de las IDE de manera global, exponiendo las circunstancias tecnológicas, políticas y normativas que las rodean. Por esta razón y tras la impartición en la UPM de seis cursos de 150 h (AECID + IGN de España), dirigidos a técnicos superiores iberoamericanos y de quedar evidenciada la necesidad de un texto que considere en forma ordenada los fundamentos detrás de las IDE, se ha procedido a su redacción. El Libro tiene la vocación de constituirse en un texto de referencia para la docencia universitaria en Iberoamérica y España, y para ello cuenta entre sus autores a representantes de la mayoría de los países de la región.
