Crime Human Nature James Q. Wilson, Richard J. Herrnstein, 1998 From Simon & Schuster, *Crime & Human Nature* is the definitive study of the causes of crime. Assembling the latest evidence from the fields of sociology, criminology, economics, medicine, biology, and psychology and exploring the effects of such factors as gender, age, race, and family, two eminent social scientists frame a groundbreaking theory of criminal behavior.

Crime and Nature Marcus Felson, 2006-03-13 *Crime and Nature*, written by the always innovative and original Marcus Felson, is the first text to provide students with a unique, new perspective for thinking about crime and how modern society can reduce crime's ecosystem and limit its diversity.

Nature Crime Rosaleen Duffy, 2010-08-31 The perilous state of endangered species such as tigers and rhinos, and the worldwide illegal trade in ivory, diamonds, bushmeat and many other rare and valuable commodities, are familiar issues in the West. The heroes in these narratives are those who work to create protected areas for wildlife; the villains the shadowy poachers and smugglers who destroy endangered animals and their habitats for the sake of profit. In this groundbreaking book, Rosaleen Duffy argues that the story is much more complex than this. She analyses the workings of the black-market wildlife industry, pointing out that illegal trading is often the direct result of Western consumer desires, from coltan for mobile phones to caviar for the global elite. She looks at how tourists contribute, often unwittingly, to the destruction of natural environments. Most strikingly, she argues that the imperatives of Western-style conservation often result in serious injustice to local people, who are at risk of losing not only their land but sometimes even their lives. The result of many years of first-hand research, this book is essential reading for anyone who wants to understand the complex realities of nature

conservation.--Jacket.

Law and Nature David Delaney,2003-10-13 This interdisciplinary study explores the relationship between conceptions of nature and (largely American) legal thought and practice. It focuses on the politics and pragmatics of nature talk as expressed in both extra-legal disputes and their transformation and translation into forms of legal discourse (tort, property, contract, administrative law, criminal law and constitutional law). Delaney begins by considering the pragmatics of nature in connection with the very idea of law and the practice of American legal theorization. He then traces a set of specific political-legal disputes and arguments. The set consists of a series of contexts and cases organized around a conventional distinction between 'external' and 'internal nature': forces of nature, endangered species, animal experiments, bestiality, reproductive technologies, genetic screening, biological defenses in criminal cases, and involuntary medication of inmates. He demonstrates throughout that nearly any construal of 'nature' entails an interpretation of what it is to be (distinctively) human.

What is Crime? Stuart Henry,Mark Lanier,2001 For decades, scholars have disagreed about what kinds of behavior count as crime. Is it simply a violation of the criminal law? Is it behavior that causes serious harm? Is the seriousness affected by how many people are harmed and does it make a difference who those people are? Are crimes less criminal if the victims are black, lower class, or foreigners? When corporations victimize workers is that a crime? What about when governments violate basic human rights of their citizens, and who then polices governments? In *What Is Crime?* the first book-length treatment of the topic, contributors debate the content of crime from diverse perspectives: consensus/moral, cultural/relative, conflict/power, anarchist/critical, feminist, racial/ethnic, postmodernist, and integrational. Henry and Lanier synthesize these perspectives and explore what each means for crime control policy.

The text also focuses on how criminology shapes public policy.
