**Tulsa** Larry Clark, 2000 Clark's classic photo-essay of Midwestern youth caught in the tumult of the 1960s is available for the first time in nearly 20 years. The raw, haunting images document a youth culture progressively overwhelmed by self-destruction and are as moving and disturbing as when they first appeared.

**Encyclopedia of Twentieth-Century Photography, 3-Volume Set** Lynne Warren, 2005-11-15 The Encyclopedia of Twentieth-Century Photography explores the vast international scope of twentieth-century photography and explains that history with a wide-ranging, interdisciplinary manner. This unique approach covers the aesthetic history of photography as an evolving art and documentary form, while also recognizing it as a developing technology and cultural force. This Encyclopedia presents the important developments, movements, photographers, photographic institutions, and theoretical aspects of the field along with information about equipment, techniques, and practical applications of photography. To bring

this history alive for the reader, the set is illustrated in black and white throughout, and each volume contains a color plate section. A useful glossary of terms is also included.

**Photography Books Index III** Martha Kreisel, 2006 While the Internet is an important source for locating photographic images, there still are hundreds of photography books published each year for whose contents there is no external access. This second supplement to Photography Books Index addresses this need by analyzing important photographic anthologies that have been published since 1985. Accessing more than fifty photographic anthologies that are widely held in libraries across the country--along with images from two critical annual compilations, Best of Photojournalism and Graphis Annual--this book identifies photographs that record the history of our times. This reference guide provides an important index to contemporary as well as historical photographers, including those for whom full monographs have not been published. Photographs of important individuals as well as photographic records of cataclysmic events can be located through this index. Extensive descriptions of the individual photographs--from the commonplace to the extraordinary--are identified in this volume. Organized into three sections--Photographers, Subjects of Photographs, and Portraits of Named Individuals--these descriptions provide the researcher with important information on each photograph. An essential volume for all public, special and academic libraries, this index will be an invaluable resource for reporters, historians, academics, students and anyone wishing to research photographs and photographers.

*American Photography* Miles Orvell, 2003 150 years of American photography come alive in this exciting new book, placing it in its cultural context for the first time. Orvell examines this fascinating subject through a wide range of well known and less-well known images. He ranges from portraiture and landscape photography, family albums and memory, and analyses the particularly 'American' way in which American photographers have viewed the world around them. Orvell combines a clear overview of the changing nature of photographic thinking and practice in this period with an exploration of key concepts. The result is the first coherent history of American photography, which examines issues such as the nature of photographic exploitation, experimental techniques, the power of the photograph to shock, and whether we should subscribe to the notion of a visual history.

*Seizing the Light* Robert Hirsch, 2017-04-07 The definitive history of photography book, *Seizing the Light: A Social & Aesthetic History of Photography* delivers the fascinating story of how photography as an art form came into being, and its
