Medieval Islamic Civilization Josef W. Meri, 2006 Examines the socio-cultural history of the regions where Islam took hold between the 7th and 16th century. This two-volume work contains 700 alphabetically arranged entries, and provides a portrait of Islamic civilization. It is of use in understanding the roots of Islamic society as well to explore the culture of medieval civilization.

Medieval Science, Technology, and Medicine Thomas F. Glick, Steven Livesey, Faith Wallis, 2014-01-27 Medieval Science, Technology, and Medicine details the whole scope of scientific knowledge in the medieval period in more than 300 A to Z entries. This resource discusses the research, application of knowledge, cultural and technology exchanges, experimentation, and achievements in the many disciplines related to science and technology. Coverage includes inventions, discoveries, concepts, places and fields of study, regions, and significant contributors to various fields of science. There are also entries on South-Central and East Asian science. This reference work provides an examination of medieval scientific tradition as well as an appreciation for the relationship between medieval science and the traditions it supplanted and those that replaced it. For a full list of entries, contributors, and more, visit the Routledge Encyclopedias of the Middle Ages website.

The Art of Jihad Malik Mufti, 2019-10-01 Identifies and traces the evolution of a forgotten “realist” tradition in medieval Islamic political thought, and considers the prospects for its revival in the context of the contemporary Middle East. Now all but forgotten, there exists within medieval Islamic political thought a coherent “realist” tradition analogous to its Western counterpart. In *The Art of Jihad*, Malik Mufti begins by analyzing contemporary debates on jihad designed to highlight the lacuna occupied by realism in other cultures. He explicates the features of medieval Islamic realism; those it shares with realism everywhere—a focus on power, for example, or the ubiquity of human conflict—but also those features that are distinctive: its insistence on the political centrality of religion, its rejection of scientific certainty, its valorization of hierarchy, and its adherence to empire as the optimal ethico-political framework. These features are fleshed out through the writings of medieval political thinkers such as Ibn al-Muqaffa`, al-Jahiz, and the anonymous author of a seminal military manual, as well as political philosophers such as Ibn Rushd and Ibn Khaldun. Finally, Mufti explores the prospects for a revival of Islamic realism in the context of the political and intellectual upheavals currently besetting the Middle East. “There are few more

important themes in Islamic political thought than the problem and status of jihad. Despite the great richness of the Islamic tradition, it is widely recognized that less progress has been made than one might hope in contending in a fruitful way with this phenomenon. This book is one of those rare works that offers a new way of looking at the matter.” — Joshua Parens, author of *An Islamic Philosophy of Virtuous Religions: Introducing Alfarabi*

The Phenomenological Quest Between Avicenna and Heidegger Nader El-Bizri, 2000 The Phenomenological Quest between Avicenna and Heidegger investigates Avicenna’s (Ibn Sina’s; 980–1037) ontological, epistemological, mystic, and linguistic accounts of being while at the same time accounting for Martin Heidegger’s critique of the history of metaphysics. This investigation constitutes one of the first elaborate examinations of Avicenna’s phenomenological considerations of the question of being. The consideration of Avicenna’s philosophical works has been mainly conducted through primary Arabic medieval texts that have not yet been translated into English, French, or German, nor sufficiently addressed by Western scholarship. Martin Heidegger claims that the history of metaphysics is the history of the oblivion of being while holding that his “fundamental ontology” presents a “genuine phenomenological account that attempts to overcome metaphysics.” However, Avicenna’s philosophical works do testify to the emergence of a phenomenological philosophical tradition that took the question of being to be the most central question of philosophical investigations. This Avicennian philosophical heritage grounded subsequent developments that attested to the rise of a new strain in ontology that overcomes substance and subject based ontology while being characterized by salient phenomenological dimensions. To sum up, Avicenna’s philosophical accounts of being present phenomenological dimensions in ontology that offer alternative phenomenological methods of investigation in ontology that would contribute to the renewal of philosophy in general, and ontology and metaphysics in particular.

The Literature of Islam Paula Youngman Skreslet, Rebecca Skreslet, 2006-09-20 Reference librarian and archivist Paula (Union Theological Seminary and Presbyterian School of Christian Education, Virginia) and Rebecca, a scholar of Arabic studies, present a critically annotated bibliography of central works on Islam that are available in English translation. They write for readers who are acquainted with the basic ideas, history.

The Muslim 100 Muhammad Khan, 2009-09-01 Short biographies of the most influential Muslims in history and today. A must-have book.

Islamic Theology and Philosophy Michael E. Marmura, 1984-01-01 Some of the foremost living scholars in Islamic thought have come together to create a standard and definitive work on the subject of Islamic thought. Noted scholars from North America, Europe, and the Middle East offer new and generative interpretations of major themes in the field. They address perennial theological and philosophical questions: the nature of the God-head, the ultimate constitution of matter, the world's origin, causality, divine providence and the existence of evil, freedom and determinism, political wisdom, and the

reaches of human knowledge, The contributions include historical and analytical expositions of these issues in medieval Islam as well as discussions of individual thinkers, translations of Arabic texts with commentary, comparisons of Greek and Islamic thought, and bibliographical and textual sources. As a whole, these essays offer a wealth of philosophical, theological, bibliographical, philological, and historical information. Among the outstanding contributions are: an article by Charles Butterworth on Aristotle's rhetoric and how it was understood by al-Farabi, Avicenna and Averroes; Richard M. Frank's essay on the concepts of atoms and bodies, one of the most complex subjects in Islamic theology; and an article by Shams Inati on Ibn Sina and single expressions that discusses how language relates to mental processes and the unknown. Michael E. Marmura develops a new perspective on the subject of efficient causality, emphasizing the paradigmatic position of God's relationship to the world; Muhsin Mahdi analyzes a treatise of Averroes' that deals with the relationship between philosophy and law.

Premises and Problems Luiza Franco Moreira, 2021-05-01 World literature, many have stressed, is a systematic category. Both literary scholars and social scientists have argued that the prestige of the major literary languages is key to establishing the shape of the overall system. In order to critically interrogate world literature and cinema, *Premises and Problems* approaches this system from the perspective of languages and film traditions that do not hold a hegemonic position. This perspective raises new questions about the nature of literary hegemony and the structure of world literature: How is hegemony established? What are the costs of losing it? What does hegemony mask? How is it masked? The contributors focus predominantly on literatures outside the small circle of prestigious modern European languages and on films and film criticism produced outside the best-known centers. The inclusion of this unfamiliar material calls attention to some areas of obscurity that make key features of the system indistinct, or that make it difficult to trace relationships between texts that hold different levels of prestige, such as those of the Global North and the Global South. The book argues that the study of world literature and cinema will profit from a sustained and informed engagement with the body of work produced by historical social scientists committed to the perspective of the world-system.

Routledge Revivals: Medieval Science, Technology and Medicine (2006) Thomas Glick, Steven J. Livesey, Faith Wallis, 2017-07-05 First published in 2005, this encyclopedia demonstrates that the millennium from the fall of the Roman Empire to the Renaissance was a period of great intellectual and practical achievement and innovation. In Europe, the Islamic world, South and East Asia, and the Americas, individuals built on earlier achievements, introduced sometimes radical refinements and laid the foundations for modern development. *Medieval Science, Technology, and Medicine* details the whole scope of scientific knowledge in the medieval period in more than 300 A to Z entries. This comprehensive resource discusses the research, application of knowledge, cultural and technology exchanges, experimentation, and achievements in the many disciplines related to science and technology. It also looks at the relationship between medieval science and the

traditions it supplanted. Written by a select group of international scholars, this reference work will be of great use to scholars, students, and general readers researching topics in many fields, including medieval studies, world history, history of science, history of technology, history of medicine, and cultural studies.

The Cambridge Companion to Leo Strauss Steven B. Smith, 2009-05-11 Leo Strauss was a central figure in the twentieth century renaissance of political philosophy. The essays of *The Cambridge Companion to Leo Strauss* provide a comprehensive and non-partisan survey of the major themes and problems that constituted Strauss's work. These include his revival of the great 'quarrel between the ancients and the moderns,' his examination of tension between Jerusalem and Athens, and most controversially his recovery of the tradition of esoteric writing. The volume also examines Strauss's complex relation to a range of contemporary political movements and thinkers, including Edmund Husserl, Martin Heidegger, Max Weber, Carl Schmitt, and Gershom Scholem, as well as the creation of a distinctive school of 'Straussian' political philosophy.

Soft Force Ellen Anne McLarney, 2015-05-26 The unheralded contribution of women to Egypt's Islamist movement—and how they talk about women's rights in Islamic terms In the decades leading up to the Arab Spring in 2011, when Hosni Mubarak's authoritarian regime was swept from power in Egypt, Muslim women took a leading role in developing a robust Islamist presence in the country's public sphere. *Soft Force* examines the writings and activism of these women—including scholars, preachers, journalists, critics, actors, and public intellectuals—who envisioned an Islamic awakening in which women's rights and the family, equality, and emancipation were at the center. Challenging Western conceptions of Muslim women as being oppressed by Islam, Ellen McLarney shows how women used soft force—a women's jihad characterized by nonviolent protest—to oppose secular dictatorship and articulate a public sphere that was both Islamic and democratic. McLarney draws on memoirs, political essays, sermons, newspaper articles, and other writings to explore how these women imagined the home and the family as sites of the free practice of religion in a climate where Islamists were under siege by the secular state. While they seem to reinforce women's traditional roles in a male-dominated society, these Islamist writers also reoriented Islamist politics in domains coded as feminine, putting women at the very forefront in imagining an Islamic polity. Bold and insightful, *Soft Force* transforms our understanding of women's rights, women's liberation, and women's equality in Egypt's Islamic revival.

Aisha's Cushion Jamal J. Elias, 2012-11-15 Westerners have a strong impression that Islam does not allow religious imagery. Elias corrects this view. Unearthing shades of meaning in Islamic thought throughout history, he argues that Islamic perspectives on representation and perception should be sought in diverse areas such as optics, alchemy, dreaming, vehicle decoration, Sufi metaphysics.

Self-Awareness in Islamic Philosophy Jari Kaukua, 2015-01-01 This important book investigates the emergence and

development of a distinct concept of self-awareness in post-classical, pre-modern Islamic philosophy. Jari Kaukua presents the first extended analysis of Avicenna's arguments on self-awareness - including the flying man, the argument from the unity of experience, the argument against reflection models of self-awareness and the argument from personal identity - arguing that all these arguments hinge on a clearly definable concept of self-awareness as pure first-personality. He substantiates his interpretation with an analysis of Suhrawardī's use of Avicenna's concept and Mullā Sadrā's revision of the underlying concept of selfhood. The study explores evidence for a sustained, pre-modern and non-Western discussion of selfhood and self-awareness, challenging the idea that these concepts are distinctly modern, European concerns. The book will be of interest to a range of readers in history of philosophy, history of ideas, Islamic studies and philosophy of mind.

Maimonides in His World Sarah Stroumsa, 2009 While the great medieval philosopher, theologian, and physician Maimonides is acknowledged as a leading Jewish thinker, his intellectual contacts with his surrounding world are often described as related primarily to Islamic philosophy. *Maimonides in His World* challenges this view by revealing him to have wholeheartedly lived, breathed, and espoused the rich Mediterranean culture of his time. Sarah Stroumsa argues that Maimonides is most accurately viewed as a Mediterranean thinker who consistently interpreted his own Jewish tradition in contemporary multicultural terms. Maimonides spent his entire life in the Mediterranean region, and the religious and philosophical traditions that fed his thought were those of the wider world in which he lived. Stroumsa demonstrates that he was deeply influenced not only by Islamic philosophy but by Islamic culture as a whole, evidence of which she finds in his philosophy as well as his correspondence and legal and scientific writings. She begins with a concise biography of Maimonides, then carefully examines key aspects of his thought, including his approach to religion and the complex world of theology and religious ideas he encountered among Jews, Christians, Muslims, and even heretics; his views about science; the immense and unacknowledged impact of the Almohads on his thought; and his vision of human perfection. This insightful cultural biography restores Maimonides to his rightful place among medieval philosophers and affirms his central relevance to the study of medieval Islam.

Silent Contributors Asif Ahmed Srabon, 2023-09-14 *Silent Contributors: Unveiling 10 Forgotten Muslim Visionaries* by Asif Ahmed Srabon is a captivating exploration of the often-overlooked individuals who have made remarkable contributions to society. This thought-provoking book sheds light on the inspiring stories and achievements of ten extraordinary Muslim visionaries whose impact has been hidden in the shadows of history. Through compelling narratives and meticulous research, Asif Ahmed Srabon brings these unsung heroes to the forefront, offering readers a fresh perspective on their enduring legacies and the profound influence they've had on our world. This enlightening work is a must-read for anyone interested in uncovering the hidden gems of history.

Routledge Revivals: Medieval Islamic Civilization (2006) Josef Meri, 2018-01-12 Islamic civilization flourished in the

Middle Ages across a vast geographical area that spans today's Middle and Near East. First published in 2006, *Medieval Islamic Civilization* examines the socio-cultural history of the regions where Islam took hold between the 7th and 16th centuries. This important two-volume work contains over 700 alphabetically arranged entries, contributed and signed by international scholars and experts in fields such as Arabic languages, Arabic literature, architecture, history of science, Islamic arts, Islamic studies, Middle Eastern studies, Near Eastern studies, politics, religion, Semitic studies, theology, and more. Entries also explore the importance of interfaith relations and the permeation of persons, ideas, and objects across geographical and intellectual boundaries between Europe and the Islamic world. This reference work provides an exhaustive and vivid portrait of Islamic civilization and brings together in one authoritative text all aspects of Islamic civilization during the Middle Ages. Accessible to scholars, students and non-specialists, this resource will be of great use in research and understanding of the roots of today's Islamic society as well as the rich and vivid culture of medieval Islamic civilization.

A Concise History of Afghanistan in 25 Volumes Hamid Wahed Alikuzai, 2013-10 For 35,000 years ancient Afghanistan was called Aryana (the Light of God) has existed. Then in 747 AD what is today called Afghanistan became Khorasan (which means Sunrise in Dari) which was a much larger geographical area. In the middle of the nineteenth century the name Afghanistan, which means home of the united tribes, was applied originally by the Saxons (present day British) and the Russians. During the Great Games in the middle of nineteenth century, the Durand Line was created in 1893 and was in place until 1993. Saxons created the state of Afghanistan out of a geographical area roughly the size of Texas: in 1893 before which there were 10 million square kilometers, larger than the size of Canada, as means to act as a buffer zone between the Saxon-India & Tsarist-Russia and the Chinese.
