**Social Types in Southern Prose Fiction ...** Marion Clifford Harrison,1921

**Character and Meaning in the Novels of Victor Hugo** Isabel Roche,2007 While Victor Hugo's lasting appeal as a novelist can in large part be attributed to the unforgettable characters that he created, character has been paradoxically the most criticized and least understood element of his fiction. *Character and Meaning in the Novels of Victor Hugo* provides readers with a deeper understanding of the complexities and nuances that characterize both Hugo's novel writing and the nineteenth-century French novel, and will thus appeal to the specialist and non-specialist alike.

**Fiction as Research Practice** Patricia Leavy,2016-06-16 The turn to fiction as a social research practice is a natural extension of what many researchers and writers have long been doing. Patricia Leavy, a widely published qualitative researcher and a novelist, explores the overlaps and intersections between these two ways of understanding and describing human experience. She demonstrates the validity of literary experimentation to the qualitative researcher and how to incorporate these practices into research projects. Five short stories and excerpts from novellas and novels show these methods in action. This book is an essential methodological introduction for those interested in studying or practicing arts-based research.

**Questions of Character** Iskra Fileva,2016-10-11 This collection features 26 new essays on character from first-rate scholars in philosophy, psychology, economics, and law. The essays are elegantly written and combine forceful argumentation with original ideas on a wide range of questions, such as: Is Aristotle's theory of character a moral theory?, Are character traits in tension with personal autonomy, How do traits differ from mental disorders?, What is the role of gossip in character attribution?, and Can businessmen be virtuous? The chapters are organized thematically into 5 sections, each prefaced by its own special introduction. In the introductions, the editor brings out often unexpected connections among different lines of argument pursued by the authors and raises important questions for further discussion. The collection as a whole offers students of character a unique opportunity to engage with some of the best contemporary work on the topic.

**Geek and Hacker Stories** Brian Alleyne,2018-11-02 Geeks, hackers and gamers share a common 'geek culture', whose members are defined and define themselves mainly in terms of technology and rationality. The members of geek culture

produce and circulate stories to express who they are and to explain and justify what they do. Geek storytelling draws on plots and themes from the wider social and cultural context in which geeks live. The author surveys many stories of heated exchanges and techno-tribal conflicts that date back to the earliest days of personal computing, which construct the “self” and the “enemy”, and express and debate a range of political positions. Geek and Hacker Stories will be of interest to students of digital social science and media studies. Both geeky and non-technical readers will find something of value in this account.

*College Composition* Raymond Woodbury Pence, 1929 This text for college freshmen is based upon a number of strongly held beliefs. 1. A book for college freshmen should aim at respectable English for the ordinary purpose of life -- not authorship. 2. During the freshmen year the forming of correct language habits is by far the most important thing. 3. The teacher should give the student very early a clear-cut notion as to what constitutes criticism. 4. As the course continues, the student should do more and more revising before submitting a theme to the teacher's criticism. 5. The student's time is precious. They should be given only those writing tasks that serve either to establish good habits or that open them up to new knowledge of English composition. 6. The teacher's time is precious. An instructor should not be expected to spend it on a theme that the student has not put into the best condition of which they are capable. 7. It is best to begin with a course with freshmen slowly -- even in an elementary manner -- with something that is easily within their comprehension.
