Family Medicine J. L. Buckingham, E. P. Donatelle, W. E. Jacott, M. G. Rosen, Robert B. Taylor, 2013-06-29 JOHN S. MILLIS In 1966 the Citizens Commission on Graduate Medical Education observed that the explosive growth in biomedical science and the consequent increase in medical skill and technology of the twentieth century had made it possible for physicians to respond to the episodes of illness of patients with an ever-increasing effectiveness, but that the increase in knowledge and technology had forced most physicians to concentrate upon a disease entity, an organ or organ system, or a particular mode of diagnosis or therapy. As a result there had been a growing lack of continuing and comprehensive patient care. The Commission expressed the opinion that Now, in order to bring medicine's enhanced diagnostic and therapeutic powers fully to the benefit of society, it is necessary to have many physicians who can put medicine together again. ! The Commission proceeded to recommend the education and training of substantial numbers of Primary Physicians who would, by assuming primary responsibility for the patient's welfare in sickness and in health, provide continuing and comprehensive health care to the citizens of the United States. In 1978 it is clear that the recommendation has been accepted by the public, the medical profession, and medical education. There has been a vigorous response in the development of family medicine and in the fields of internal medicine, pediatrics, and obstetrics. One is particularly impressed by the wide acceptance on the part of medical students of the concept of the primary physician. Dr. John S.

Graduate Medical Education in Family Medicine Rick Kellerman, Gretchen Irwin, 2025-03-29 This book outlines the basic structure and processes of family medicine residency education programs. Family medicine residency programs are complex adaptive learning organizations that involve people, processes, procedures, buildings, budgets, high stakes,

mistakes, mission statements, strategies, schedules, curricula, faculty, and residents. Residency program faculty are faced with many challenges, and this book gives them and others who are interested or involved in residency programs a clear and comprehensive breakdown of family medicine graduate medical education. The volume opens with detailed overviews of several family medicine organizations that support residency programs and faculty. Subsequent chapters cover a range of topics, including best practices in resident assessment and evaluation and best practices pertinent to the development of teaching and administrative skills for faculty. Furthermore, chapters explain necessary residency education accreditation requirements, which includes the understanding of the accreditation requirements, board certification requirements, Medicare graduate medical education funding policies, and Centers for Medicare and Medicaid Services (CMMS) billing regulations. All authors have been family medicine residency program directors or faculty or have been intimately involved in residency program education. Graduate Medical Education in Family Medicine offers residency program directors, faculty, and residency administrators a wide-ranging and comprehensive overview of family medicine residency education as well as specific administrative and educational best practices for residency education. This book will also be useful to those physicians with experience in their clinical field, but not in educational pedagogy and andragogy.
