The Routledge Companion to Interdisciplinary Studies in Singing, Volume III: Wellbeing Rachel Heydon, Daisy Fancourt, Annabel J. Cohen, 2020-05-19 The Routledge Companion to Interdisciplinary Studies in Singing, Volume III: Wellbeing explores the connections between singing and health, promoting the power of singing—in public policy and in practice—in confronting health challenges across the lifespan. These chapters shape an interdisciplinary research agenda that advances singing's theoretical, empirical, and applied contributions, providing methodologies that reflect individual and cultural diversities. Contributors assess the current state of knowledge and present opportunities for discovery in three parts: Singing and Health Singing and Cultural Understanding Singing and Intergenerational Understanding In 2009, the Social Sciences and Humanities Research Council of Canada funded a seven-year major collaborative research initiative known as Advancing Interdisciplinary Research in Singing (AIRS). Together, global researchers from a broad range of disciplines addressed three challenging questions: How does singing develop in every human being? How should singing be taught and used to teach? How does singing impact wellbeing? Across three volumes, The Routledge Companion to Interdisciplinary Studies in Singing consolidates the findings of each of these three questions, defining the current state of theory and research in the field. Volume III: Wellbeing focuses on this third question and the health benefits of singing, singing praises for its effects on wellbeing.

Handbook of Arts-Based Research Patricia Leavy, 2019-02-27 The handbook is heavy on methods chapters in different genres. There are chapters on actual methods that include methodological instruction and examples. There is also ample attention given to practical issues including evaluation, writing, ethics and publishing. With respect to writing style, contributors have made their chapters reader-friendly by limiting their use of jargon, providing methodological instruction when appropriate, and offering robust research examples from their own work and/or others.--

Restorative Embodiment and Resilience Alan Fogel, Ph.D.,2021-09-28 An expanded take on traditional Embodied Self-Awareness therapy, ideal for practitioners in all areas of body-focused work, including yoga, meditation, and somatic psychotherapy Embodied Self-Awareness (ESA) is a somatic approach to treat trauma and other mental health concerns by helping people connect directly to thoughts, sensations, and emotions as they arise within the body. Here, psychologist Alan Fogel introduces Restorative ESA, an expansion of traditional ESA that incorporates three new and unique ESA states: Restorative, Modulated, and Dysregulated. Using a research-backed approach, Fogel explains their underlying neuroscience with concrete examples to illustrate how these states impact our personal and professional lives. Fogel shows that wellness is more than the ability to moderate one's inner state by regulating and tolerating emotions. By shifting from states of doing to allowing, from activation to receptivity, and from thinking to felt experience, we can access the expansive power of the restorative state and heal the body, mind, and spirit.

Disability and Postsocialism Teodor Mladenov,2017-08-07 In the decades following the collapse of state socialism at the end of 1980s, disabled people in Central and Eastern Europe endured economic marginalisation, cultural devaluation and political disempowerment. Some of the mechanisms producing these injustices were inherited from state socialism, while others emerged with postsocialist neoliberalisation. State socialism promised social security guaranteed by the public, and postsocialist neoliberalisation promised independent living underpinned by the market. This book argues that both promises failed as far as disabled people were concerned, drawing on a wide range of scholarly reports and analyses, policy documents, legislation, and historical accounts, as well as on disability studies and social justice theory. Besides differences, the book also illuminates continuities between state socialism and postsocialist capitalism, providing on this basis a more general and historically grounded critique of contemporary neoliberalisation and its impact on individual and collective life. The book will appeal to anyone interested in disability studies and postsocialism, as well as social policy, social movements and critical theory. It will also be of interest to professionals involved in disability-related service provision, as well as to disability activists and policy makers.

The Art and Science of Making the New Man in Early 20th-Century Russia Yvonne Howell,Nikolai Kremmentsov,2021-12-02 The idea that morally, mentally, and physically superior 'new men' might replace the currently existing mankind has periodically seized the imagination of intellectuals, leaders, and reformers throughout history. This volume offers a multidisciplinary investigation into how the 'new man' was made in Russia and the early Soviet Union in the first third of the 20th century. The traditional narrative of the Soviet 'new man' as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here. The book focuses on the interplay between the rapidly developing experimental life sciences, such as biology, medicine, and psychology, and countless cultural products, ranging from film and fiction, dolls and museum exhibits to pedagogical projects, sculptures, and exemplary agricultural fairs. With contributions from scholars based in the United States, Canada, the UK, Germany and Russia, the picture that emerges is emphatically more complex, contradictory, and suggestive of strong parallels with other 'new man' visions in

Europe and elsewhere. In contrast to previous interpretations that focused largely on the apparent disconnect between utopian 'new man' rhetoric and the harsh realities of everyday life in the Soviet Union, this volume brings to light the surprising historical trajectories of 'new man' visions, their often obscure origins, acclaimed and forgotten champions, unexpected and complicated results, and mutual interrelations. In short, the volume is a timely examination of a recurring theme in modern history, when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind.

Solving Everyday Problems With The Scientific Method: Thinking Like A Scientist (Second Edition) Don K Mak,Angela T Mak,Anthony B Mak,2016-12-21 This book describes how one can use The Scientific Method to solve everyday problems including medical ailments, health issues, money management, traveling, shopping, cooking, household chores, etc. It illustrates how to exploit the information collected from our five senses, how to solve problems when no information is available for the present problem situation, how to increase our chances of success by redefining a problem, and how to extrapolate our capabilities by seeing a relationship among heretofore unrelated concepts. One should formulate a hypothesis as early as possible in order to have a sense of direction regarding which path to follow. Occasionally, by making wild conjectures, creative solutions can transpire. However, hypotheses need to be well-tested. Through this way, The Scientific Method can help readers solve problems in both familiar and unfamiliar situations. Containing real-life examples of how various problems are solved — for instance, how some observant patients cure their own illnesses when medical experts have failed — this book will train readers to observe what others may have missed and conceive what others may not have contemplated. With practice, they will be able to solve more problems than they could previously imagine. In this second edition, the authors have added some more theories which they hope can help in solving everyday problems. At the same time, they have updated the book by including quite a few examples which they think are interesting.
